Pro Mound[®] clay blocks

For top performance on the mound...

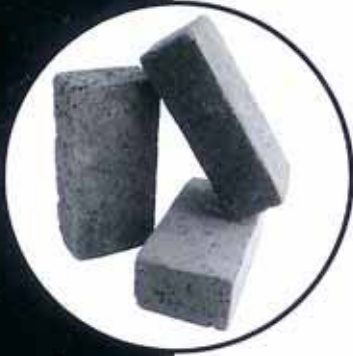

and in the batter's boxes you can count on Pro Mound blocks. Installed just below the playing surface, these squares of solid, stabilizing clay, will eliminate deep wear holes and give players firm traction at the mound and in batter's box areas.

At nearly seven pounds each, Pro Mound Blocks are long lasting and won't crumble or crack. In addition to providing sure footing, they will significantly reduce the need for mound maintenance.

Ask about our entire team of sports field products for top performance on your baseball, football and soccer fields.

Pro Mound® clay blocks

Pro Mound blocks are easy to install. It requires only a shovel, rake, tamp and water to resurface and maintain the mound, batter's boxes and catcher's station.

To Install:

- 1a. At the mound, remove the top 3-4 inches of soil from the area around and in-front-of the rubber (as shown) or only in the high wear areas, such as immediately in front of the rubber and in the foot landing area.
- 1b. Remove 3-4 inches of soil from the batter's boxes and catcher's station (either the entire box dimensions or only in the worn areas).
2. Install Pro Mound Blocks (as shown) covering the excavated areas, lining blocks up edge to edge.
3. Water area and allow the water to soak into the blocks for 1-2 hours.
4. Cover each area with a skin coating of infield mix and tamp down. Apply two bags of Soilmaster® Select infield conditioner or Rapid Dry® drying agent to absorb surface moisture.

To Maintain:

Lightly water mound, catcher's station and batter's boxes and cover with a tarp when not in use. If this is not possible, cover them with a light coating of Soilmaster infield conditioner to maintain the correct moisture level.

Shipping Information:

Pro Mound Blocks are sold per cube. In each cube you will receive 312 individual blocks. Each cube has a shipping weight of about 2000 pounds and comes on a pallet.

Pro's Choice also offers loose Pro Mound® packing clay for an easy-to-use patching tool – great for holes and divots in your mounds and batter's boxes.

Pro Mound clay blocks are sold in cubes of 312 pre-formed blocks shipped on a pallet.
